

## HiFlex

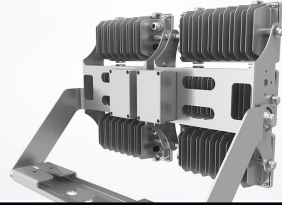

Professional sports lighting solution

- Up to 1200W 16,2000 lm
- 10°, 15°, 15x40° and 30°, 45°, 60°

### Compact and lightweight design

Strategies for staying cost competitive, and it's easy to replace the traditional fittings, no need to worry about the limitations of the installation space.

### Different optics for different installation height

Excellent performance for sport and area lighting

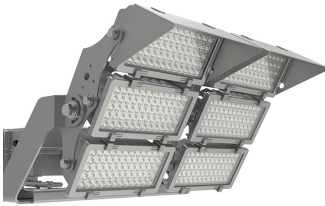

### Double protection

Tempered glass prevents PC lens from yellowing when the fixture is exposed, it also protects the lens from sand and dust deposition. It's well-suited for outdoor applications.

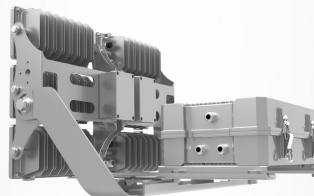

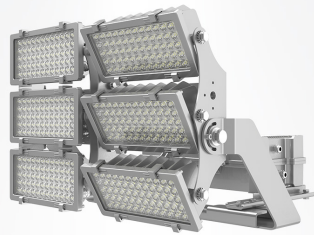

### Visor is available

### Each module can be adjusted separately

It makes the light distribute in different directions

**Vent design**  
Balancing the atmosphere pressure and avoiding moisture

**Separate driver box**  
For easy installation & maintenance

**Bending bracket**  
Fast installation and less labor cost

### International soccer field: 100m x 64m

Flux level: 1400lx
