# Introduction

◀ DB45 is a module changeable design LED batten, provide good heat dissipation, quality light and substantial energy and maintenance savings. Varies module (reflector type and diffuser type) can meet different requirements. Suspended , surface mounted and splicing installation optional. The process of installing and maintaining is so easy.

## Features

1. Module changeable, with easy installation and maintenance
2. Module type optional (type A reflector design, Type B diffuser design)
3. Color temperature switchable by DIP switch
3. Splicing design

## Application Areas

It is mainly used for traditional suspended installation such as workshop, utility rooms, garages and more.

## Measurement

## Installation Procedure

### WARNING

1. Switch off before installation.
2. Switch on only after complete installation and examination of the circuit.
3. Professional electrician for installation and maintenance only.

**Turn Off Power Supply**

Turn Off power supply before starting any installation. Read instructions & check you have all the tools & accessories to complete the installation correctly.

### Suspended:

For the product with Slide Switch of Color Selection, please select the light color (CW/NW/WW) before installation.

#### Step 1

#### Step 2

Model	A±10
600mm	580mm
1200mm	1180mm

### Step 3

3.1

Push the module on both sides which will disconnect the connector, remove the module.

3.2

If need to be spliced into series, remove the end cap of each connection side, connect them by connectors and fix by screws.

### Step 4

Screw the ropes into the pedestals.

### Step 5

Connect to the power supply.

### Step 6

Put the module back and push it into the base, turn on the lamp.

## Surface mounted:

### Step 1

Insert the plastic anchor into the ceiling.

### Step 2

Push the module on both sides which will disconnect the connector, remove the module.

If need to be spliced into series, remove the end cap of each connection side, connect them by connectors and fix by screws.

---

Step 3

Fix the base on the ceiling.

Step 4

Connect to the power supply.

---

Step 5

Put the module back and push it into the base, turn on the lamp.
