

Aluminum fins heatsink, superior heat dissipation performance

Human-centric lighting

Professional optics and special structure design to achieve human-centric lighting. No uplight, excellent control of backlight and spill light. All the light is thrown to a very specific direction for desired lighting area only. People won't see the light source when standing on the ground, which makes FL10 an ideal product to make the environment comfortable for airports or sports fields.

Adjustable bracket $\pm 45^\circ$, installation angle can be adjustable

Humanized design. It's convenient for workers to carry it during installation and maintenance.
